Dear Principal,

We know technology plays a huge role in your school. Students have an incredible opportunity to learn, collaborate and prepare for their future by utilizing the technology that you are making available to them. But, did you know that Pennsylvania offers a top-notch conference where your teachers and your LEA's technology administrators can learn about innovative educational technology practices and products that can take your school to the next level?

The Pennsylvania Educational Technology Expo and Conference (PETE&C) offers more than 250 educational sessions, 3 keynote speakers offering insightful and inspirational messages and more than 250 vendors showcasing new products and services. Additionally, PETE&C offers countless opportunities to learn and network with peers while sharing their greatest successes to boost student achievement.

Please take a moment to distribute the attached flyer to your staff so they can learn about PETE&C 2020, taking place February 23-26, 2020 at the David L. Lawrence Convention Center in Pittsburgh, PA.

They will be sure to bring back knowledge that can help your school meet your students' technology needs today and in the future.

Thank you,  
Bryce Cossitor  
PETE&C Chair  
Altoona Area School District
